DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell(4,996,523).

As to claims 1-2, 31 and 32, Bell et al(4,996,523) teach a light emitting device comprising a pixel having a light emitting element(40); means(22n) for storing digital video signals and means for determining periods in which the light emitting element emits a light corresponding to the video signals(see figures 1-2; column 1, lines 58-68; column 2, lines 1-9 and lines 51-68; column 3, lines 6-16 and lines 41-68).

As to claim 32, Bell et al teach an electroluminescent display device(see column 1, lines 7-10).

3. Claims 19-23, 25, 27 and 29 and are rejected under 35 U.S.C. 102(b) as being anticipated by Kanaly(5,225,823).

As to claims 19-23, 25, 27 and 29, Kanaly teaches an LCD display device comprising a pixel having a liquid crystal cell(19); n bit memory(52, 24 bit registers) for

storing digital video signals and means for determining periods in which the liquid crystal is turned on corresponding to the video signals(see figures 3, 5, 7, 9-11; column 5, lines 4-48; column 6, lines 18-61 and column 7, lines 3-55).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 24, 26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kanaly in view of Okumura et al(5,945,972).

Kanaly fails to disclose an LCD apparatus is portable computer, or cellular phones.

Okumura et al teach an LCD display used in a portable computer or cellular phones(see column 2, lines 15-19). It would have been obvious to have modified Kanaly with the teaching of Okumura et al, since the LCD having reduced in the depth weight and power dissipation comparing to a CRT display(see Okumura et al's column 1, lines 20-26).

Allowable Subject Matter

6. Claims 3-18 and 33-62 are allowable since Kanaly(5,225,823) does not teach a counter circuit for outputting n counter signals with different frequencies.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nakamura(6,563,480) teaches an LED display having a memory cell(31).

Cok(6,636,191) teaches an Led display having storage means(14).

Koyama(US 2002/0018029) teaches a pixle having a plurality of memories.
